Subject: Use of Metal-Fab Sure-Seal DV Direct Vent Venting Systems on Johnson Gas/Mendota DV appliances.

Dear Mr. Ray,

Intertek has evaluated the Metal-Fab Sure-Seal Direct Vent Venting Systems for construction, leakage, and for combustion on representative Johnson Gas/Mendota direct vent appliances for compliance with UL Subject 2112-2000 and applicable sections of ANSI Z21.88-2006 • CSA 2.33-2006 and ANSI Z21.50-2003 • CSA 2.33-2003. As a result of these evaluations, Intertek has deemed the Metal-Fab Sure-Seal Direct Vent Venting System is acceptable for use on all Johnson Gas/Mendota direct vent appliances listed with the Warnock Hersey mark. All manufacturers with an appliance listed with a Warnock Hersey mark who wish to accept the use of the Metal-Fab Sure-Seal Direct venting system on their product, must submit either a revised instruction manual or an appendix to an existing instruction manual indicating the use of the Metal-Fab Sure-Seal Direct venting to Intertek for review.

Sincerely,

Bill Keen
Associate Engineer
